PROFILE

Results-driven, adaptable professional with a strong capacity to learn quickly and collaborate effectively. Skilled at integrating technical expertise into end-to-end full-stack solutions, with experience thriving in fast-paced environments and contributing innovative ideas that drive project success.

EXPERIENCE

Technical Lead (CitiusTech Healthcare Pvt Ltd., Mumbai)

2021-Current

- Engineered AI-enabled solutions in collaboration with cross-functional teams across multiple technology stacks.
- Refactored a monolithic system into a BFF architecture and modernized the frontend using Angular with Spring Boot.
- Implemented security controls and unit testing strategies to improve system reliability and maintainability.
- Supported and delivered multiple POCs with measurable impact and peer recognition.
- Developed a robust file validation engine and maintained concise technical documentation.

Software Developer (Sophtimize consultancy, Mumbai)

2019-2021

- Collaborated with cross-functional teams to gather and analyze requirements, translating user needs into system architecture.
- Designed and implemented an intuitive UI and optimized workflows to improve efficiency and accuracy in attendance tracking.
- Architected and deployed a secure workflow and security framework to ensure reliable communication within the mailing infrastructure.
- Designed scalable database schemas and modules to support maintainable system architecture.
- Developed an interactive, collaborative dashboard to simplify complex data visualization.

Software Developer Intern (BNP Paribas, Mumbai)

2019-2019

Successfully developed and refactored back-end applications using the Struts framework, CSS, JavaScript/jQuery, and Oracle. Implemented Excel-based reporting and developed proof-of-concept (POC) chatbots to support helpdesk operations.
